RAGINI SOLAR ILLUMINATIONS

Ragini solar illumination located in Satara, is a ownership firm engaged in Customize Designing system Integration, Commissioning of solar products, LED Products, Solar water Heater Solar power packs, Solar energy generation systems, Solar lanterns, Solar education kit, Solar power plant, LED lights (Residential, Commercial, Industrial Lightings) Our manufacturing factory unit is in Satara, and Pune. We also work with some manufacturing companies which are empanelled with MEDA (A GOVT. of Maharashtra undertaking. for solar photovoltaic based products and ISI mark flat plate collector (FPC) and evacuated tube collector (ETC) type solar water heating system.

Solar energy is a source of natural energy which is generated by heat of Sun rays in India specially in Maharashtra, we have almost 9 months clear sun Rise which helps solar products to work efficiently, for this energy we don't have to pay a single rupee, only we have to utilise this energy by spending some money to install solar technology. Also this energy don't have any harmful side effects (adverse effects) to the human body. it is energy which is Human friendly as well as environment friendly. Solar products are more durable, long lasting, maintenance less, cost saving than other energy products in a long term basis. As a primary, solar seems to be costly but in a long run it saves our money.

Day by day electricity is getting costlier also shortage to consume Solar energy is the best replacement to the electricity. In this way we can save electricity as well as our valuable money also. By doing this we are also helping to our state and nation to save human generated energy.

PRODUCT DETAILS

1-Solar water Heating System (ETC) Type

This product is used as individual as well as commonly in residential buildings, cooperative housing societies /complex, Hospitals, Bungalows ,Hotels ,Resorts, Industrial plants where hot water is required .this system can produce hot water of temp. 60 to 65*c.
